

PACE Provider List December 2018

At TRU PACE, we contract with local providers in Boulder, Lafayette, Longmont, Denver and other areas to ensure participants have access to services not available at the Center.

If you already have a primary care provider or specialty provider that you often use, **by enrolling in TRU PACE we become your primary care provider.** And because we will coordinate all of your care needs, TRU PACE **cannot guarantee or promise that you will continue to see your specialty provider(s).**

Why does this happen? When participants join PACE, their care is fully coordinated – from visits to the Center to the Clinic to home and having too many providers can cause confusion for all of us. **Coordinating all your care is an important concept of the PACE model because it has been shown that PACE case management will improve a participant's longevity, their health, and quality of life.**

Enrolling in PACE means you might have new services for pharmacy, oxygen, transportation, etc. If you have any questions about a potential change in service, please ask.
